OFFICIAL HEALTH CERTIFICATE FOR EXPORT OF BOVINE SEMEN TO UZBEKISTAN

Certificate No: _____

I, the undersigned official veterinarian, certify that

1. Semen exported to UZBEKISTAN has been collected from healthy animals and originates from the artificial insemination centre being free from the following contagious diseases of cattle:

- rinderpest, bluetongue, contagious pleuropneumonia – for the last 24 months in the Republic of Korea;
- brucellosis, tuberculosis, foot-and-mouth disease – for the last 12 months on the Artificial Insemination Centre;

2. The donor stud bulls used for Artificial Insemination should meet the following requirements:

- The donor bulls were kept at the Artificial Insemination Centre for at least 60 days prior the semen collection.
- The donor bulls have never been used for natural service.
- Within 12 months before the last semen collection, all donor bulls are subjected to negative results from paratuberculosis, enzootic leucosis, leptospirosis, infectious rhinotracheitis (IBR), bovine viral diarrhoea (BVD), trichomoniasis and campylobacteriosis.
- In cases of diseases being vaccinated, it must be tested the antigen instead of antibody.

Name of disease	Method of test	Date of test	Name of Official Laboratory
Tuberculosis			
Paratuberculosis			
Brucellosis			
Enzootic leucosis			
Infectious rhinotracheitis			

Viral diarrhea			
Leptospirosis			
Trichomoniasis			
Campylobacteriosis			

3. Donor stud bulls were not fed with feed containing ruminant proteins except for substances recommended by the OIE Code.
4. At the Artificial insemination centre the stud bulls were kept separately from the small ruminants.
5. The semen was collected, processed, stored and transported according to the OIE Code recommendations.
